Windows Update

Update status

There were problems installing some updates, but we'll try again later. If you keep seeing this and want to search the web or contact support for information, this may help:

• 2018-04 Cumulative Update for Windows 10 Version 1709 for x64-based Systems (KB4093112) - Error 0x800700d8

Your device is at risk because it's out of date and missing important security and quality updates. Let's get you back on track so Windows can run more securely. Select this button to get going:

Retry

[View installed update history](#)

Update settings

We'll automatically download and install updates, except on metered connections (where charges may apply). In that case, we'll automatically download only those updates required to keep Windows running smoothly.

[Change active hours](#)

[Restart options](#)

[Advanced options](#)

Update at your convenience

To select a convenient time to receive updates, select Change active hours and specify which hours you use your device. Windows won't update during that time.
